

Lifting Belt Sling

Lift-Tex[®] lifting belt slings represent the latest generation in heavy lifting technology. Manufactured from HMPE and polyester, they are designed to lift loads of up to 100 tonnes and comply with EN 1492-1 and EN 1492-2, featuring a 7:1 safety factor for maximum safety.

Engineered using advanced multi-channel manufacturing techniques, these slings offer a larger lifting area combined with shortened soft eyes, providing improved stability, control, and safer lifting operations.

Available in widths up to 600 mm, each sling is equipped with two reinforced soft eyes on both ends, ensuring easy hook handling, reduced wear, and long-lasting performance. For added durability, abrasion- and cut-resistant protection sleeves are available in custom lengths, extending service life and protecting the sling in demanding environments.

- Strong core
- High abrasion and cut resistance
- Up to double the service life of standard slings
- Longer lifespan
- Safer lifting operations

Material: HMPE and Polyester

Marking: According to standard, CE-marked

Standard: EN 1492-2 / EU Machinery Directive 2006/42/EC

Temperature range: -40°C up to +100°C

Safety factor: 7:1

WLL (SF 7:1) range: 10t – 100t

EWL range: 0,5m – 65m
